## ENVIRONMENTAL RESOURCE MANAGEMENT NOTES

1. **Satisfactory Progress:** By the end of the semester in which the student has attempted 60 hours (including transfer, advanced placement, advanced standing, and credit by examination), “satisfactory progress” towards a B.S. degree in Forest Resources and Environmental Conservation will include the following minimum criteria:
  - Having an in-major and overall grade point average of at least 2.0
  - Passing at least 24 semester credits that apply to Pathways General Education requirements
  - Passing the following courses or their equivalents: BIOL 1105, 1106, 1115, and 1116; CHEM 1035 and MATH 1026.
2. **Foreign Language Requirement:** A sequence of two (2) foreign language courses is required for graduation unless two (2) high school credits of the same foreign language or six (6) transfer credit hours of foreign language have been earned. These credits do not count toward graduation. See catalog section on “Graduation Requirements.”
3. **Policy on Student Exchanges:** If studying overseas or at another U.S. university, begin planning at least 9 months prior to your departure to allow time to determine what substitutions, if any, will be allowed and to arrange your schedule to ensure that all requirements for graduation will be met.
4. **In-major grade point average computation:** Includes all courses designated as FIW, FREC, GEOG, NR, SBIO, GEOS, and WATR.
5. An in-major and overall GPA of at least 2.0 is required for graduation.
6. In accordance with university guidelines, courses satisfying degree core requirements may not be double-counted to satisfy other areas of a degree (e.g. Pathways requirements).
7. \*Prerequisites: Some of the listed courses have prerequisites and some courses must be taken in sequence to satisfy prerequisites. Be sure to consult with the University Catalog or check with your advisor.
8. **For students interested in pursuing hydrology positions in the federal government, please note:**

**US Office of Personnel Management: Hydrology Qualification Standards:**  
Basic Requirements:  
Degree: physical or natural science, or engineering that included at least 30 semester hours in any combination of courses in hydrology, the physical sciences, geophysics, chemistry, engineering science, soils, mathematics, aquatic biology, atmospheric science, meteorology, geology, oceanography, or the management or conservation of water resources. The course work must have included at least 6 [credit hours] in calculus (including both differential and integral calculus, e.g., MATH 1025 and 1026), and at least 6 [credit hours] in physics (e.g., PHYS 2205 and 2206).

The Watershed Management minor will facilitate completion of additional water-related coursework that may be beneficial for those seeking federal hydrology positions. For full information, consult your advisor.
9. **Acceptable Substitutions:** The following requirements have acceptable substitutions.
  - STAT 3615 Biological Statistics: STAT 3005 Statistical Methods
  - CSES 3134 (ENSC 3134) Soils in the Landscape: CSES 3114 (ENSC 3114) Soils
